RAPHAEL TUCK & SONS’
ART PUBLISHERS TO THEIR MAJESTIES THE KING & QUEEN.

By Appointment.

The Black Grouse's favourite haunts are young plantations situated in the immediate neighbourhood of moorland; the food consists of berries, seeds, grain, and the buds of trees and plants. The male is commonly known as the black-cock, and the female as the grey-hen. The hen makes a slight nest in a hollow in the ground concealed by heather and dry bracken.

Printed in England.
